## FOREWORD

The street indexes were compiled from data available as of September 2003 in the National Geographic Database, a joint project of Statistics Canada and Elections Canada. The street indexes are published by the Chief Electoral Officer in accordance with the provisions of the Special Voting Rules, Part 11 of the *Canada Elections Act* (ss. 189, 210 and 254).

The street indexes are published as a guide to determining the electoral district in which a street address is located. In particular, they are used to determine the electoral district in which an elector who votes under the Special Voting Rules is qualified to vote at an electoral event.

A separate street index is generally published for each city or town where there is more than one electoral district; however, in some cases, neighbouring municipalities that form a natural grouping may be included in one street index. For convenience, the indexes are grouped into books by province or region.

Each index contains an alphabetical and/or numerical listing of streets within the city limits, together with civic numbers, where available, and the electoral district in which they are located. Users are asked to note that only those parts of a particular street which fall within the city limits are included. The word "ALL" means that the entire street, within the municipality, is included in the electoral district indicated.

Municipalities that fall entirely within one electoral district are listed alphabetically, followed by the electoral district name, in the *Guide to Federal Electoral Districts*.

The electoral districts mentioned in this publication are those established by the Representation Order of 2003. The names of the electoral districts are current to February 24, 2005.

September 2009

## AVANT-PROPOS

Les indicateurs des rues ont été préparés à partir des données disponibles en septembre 2003 dans la Base de données géographiques nationale. Cette base de données est un projet conjoint de Statistique Canada et Élections Canada. Les indicateurs des rues sont publiés par le directeur général des élections en conformité avec les dispositions des Règles électorales spéciales, partie 11 de la *Loi électorale du Canada* (art. 189, 210 et 254).

Les indicateurs des rues sont publiés en tant que guides pour déterminer la circonscription à laquelle une adresse donnée appartient. En particulier, ils permettent aux électeurs qui votent en vertu des Règles électorales spéciales de déterminer dans quelle circonscription ils sont habiles à voter lors d'un scrutin.

Généralement, un indicateur des rues distinct est préparé pour chaque ville où l'on retrouve plus d'une circonscription. Cependant, certains indicateurs comprennent des municipalités voisines qui forment un ensemble naturel. Afin de faciliter la recherche, les indicateurs sont regroupés par province ou région.

Chaque indicateur des rues renferme une liste en ordre alphabétique ou numérique des rues à l'intérieur des limites de la ville, avec les numéros municipaux lorsqu'ils sont disponibles, et la circonscription dans laquelle elles se trouvent. On demande aux usagers de noter que seulement les parties d'une rue qui sont à l'intérieur des limites de la ville sont visées par l'indicateur. Le mot « ENTIER » signifie que toute la rue, à l'intérieur de la ville, est comprise dans la circonscription indiquée.

Les municipalités se situant entièrement à l'intérieur d'une circonscription sont énumérées en ordre alphabétique, suivies du nom de la circonscription, dans la publication intitulée *Guide des circonscriptions fédérales*.

Les circonscriptions indiquées dans cette publication sont celles proclamées par le Décret de représentation électorale de 2003. Les noms des circonscriptions sont à jour en date du 24 février 2005.
